### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Michael Kroll on 12-07-2004.

The application has been amended as follows:

(Amended) claim 1. A marinating tray for meat food products, comprising:

a) a base tray, said base tray being [triangular] rectangular shaped having a pair of longer opposite sides, [and] a pair of shorter opposite sides, said sides upwardly extending from a bottom having a substantially flat planar surface [a bottom having an underside, and upwardly extending sidewalls on each said side] to permit fluid to be contained therein;

b) a plurality of upwardly extending spikes being disposed on a portion of said bottom in a spaced apart relationship to permit the spikes to penetrate a food product placed in the marinating tray; said bottom including a second area having no spikes,

c) a cover being complementarily shaped as said base tray so as to fit on top of said base tray, said cover being defined by a top having an upper side, and downwardly extending sidewalls on each said side, wherein said sidewalls of said cover are disposed downwardly when said cover is disposed on top of said

base tray, wherein said downwardly extending sidewalls of said cover mate with said upwardly extending sidewalls of said base tray when said cover is disposed on top of said base tray to permit fluid to be contained therein;

d) a second plurality of downwardly extending spikes being disposed on a portion of said top of said cover in a spaced apart relationship and complementarily positioned with respect to said spikes of said base tray when in the closed position to permit the spikes to penetrate a food product placed in the marinating tray; said cover including a second area having no spikes, and

e) a plurality of hinges being disposed on adjacent sides of said base tray and said cover to permit the base tray and the cover to be moved to a closed position and thereafter moved to an open position[.].

f) said base tray having a recessed concave portion positioned in said second area of said base tray, said cover having a complementarily positioned recessed concave portion in said second area of said cover, said concave portion of said base tray having a plurality of upwardly extending spikes disposed therein, and said concave portion of said cover having a plurality of downwardly extending spikes disposed therein, each concave portion is in the shape of a chicken leg.

In claim 9, line 1, delete "8" while inserting --1--.

In claim 10, line 1, delete "9" while inserting --1--.

The following is an examiner's statement of reasons for allowance: The claimed marinating tray for meat food products is believed to be in condition for allowance and is being passed onto issue. The prior art of record does not anticipate nor render obvious with proper teaching(s) the claimed invention. The claimed invention is directed to a complementary positioned and operable base tray and cover. The cover and base tray have a first portion with a plurality of spikes and second area or portion without spikes. The second areas have a recessed concave portion in which each include a plurality of extending spikes. Each concave portion is in the shape of a chicken leg.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Prior Art of Record***

The U.S Patents of Foster, Hulquist, Robinson, Shults, Hurley, Harrison, Ramsey are references which teach pivotally attached plates, each having a plurality of tines in order to tenderize meat. The reference to Hatch includes similar structure but is designed to cut food. The references to Puustinen and Beavers teach recessed portion which includes a plurality of tines in order to hold the food or to grate the food. Jaccard and Fiorello teach a meat pressing apparatus which stamp individual portions

of food in a mold. Peters teaches a package for transporting and roasting meat having a concave portion for receiving the meat product.
